Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3634

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3,6,11,12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wang et al (U.S. Patent No. 6,012,506) in view of Ciuca et al (U.S. Patent No. 6,330,899). Wang et al discloses a solar radiation shielding apparatus comprising a rotatable winding pulley 42A,42B, a lifting cord 30a,30B, a solar radiation shielding member 22, a rotatable driving shaft 41A, and a friction adjuster 50,51,52 having selectively engaging protrusions 511,521 which responds to the claimed cam mechanism having a stop engageable with a supporting member. While Wang et al do not disclose the use of an obstacle detector frictionally engaging the winding pulley, Ciuca et al disclose a solar radiation shielding apparatus comprising an obstacle detector 80 frictionally engaging a winding pulley 72, wherein, to incorporate this teaching into the solar radiation shielding apparatus of Wang et al for its explicit purpose of controlling movement would have been obvious to one of ordinary skill in the art.

2. Claims 4,5,7-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. Claims 13 and 14 are allowed.

4. Applicant's amendment clarifying the scope of claims 1-12 and presenting new claims 13,14 necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

5. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to David M. Purol whose telephone number is (571) 272-6833.
